The screenshot shows the Android Studio interface with the following details:

- Project Structure:** The left sidebar shows the project structure under the "Android" tab. It includes the "app" module with "manifests" (AndroidManifest.xml) and "java" (com.example.wordwave) packages containing various Java files like Authentication, ChatsFragment, Custom_Viewpager_Adapter, ForgetPassword, IndividualChat, IndividualUserInfo, MainActivity, MessageModel, OTP_Verification, PhoneNumber_Authentication, PhotoStatus, Profile_Initialization, ProfileFragmant, ProfilePicDialog, RecyclerAdapterIndividualChat, RecyclerAdapterPhotoStatus, RecyclerAdapterSearchBar, Row_RecyclerView_Photo_Status, Row_RecyclerView_SearchBar, Splash_Screen, StatusFragment, and ToastMaker.
- Code Editor:** The main window displays the code for `MainActivity.java`. The code initializes views and sets up Firebase authentication. Key snippets include:

```
private androidx.constraintlayout.widget.ConstraintLayout constraintLayout;
private androidx.recyclerview.widget.RecyclerView recyclerView_mainactivity;

@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity_main);

    isSignout = false;

    constraintLayout = findViewById(R.id.constraintlayout_mainactivity);
    recyclerView_mainactivity = findViewById(R.id.recyclerview_mainactivity);
    recyclerView_mainactivity.setVisibility(View.INVISIBLE);
    constraintLayout.setVisibility(View.VISIBLE);

    androidx.appcompat.widget.Toolbar toolbar = findViewById(R.id.toolbarmainactivity);
    setSupportActionBar(toolbar);

    viewPager_mainactivity = findViewById(R.id.viewpager2_mainactivity);
    setupTabLayout();
}

private void setupTabLayout() {
```
- Toolbars and Status Bar:** The top bar shows tabs for "Splash_Screen.java", "IndividualChat.java", "MainActivity.java", "build.gradle.kts (app)", "IndividualUserInfo.java", and "Auther". The status bar at the bottom shows the path "WordWave > app > src > main > java > com > example > wordwave > MainActivity > mAuth", the time "70:24", and the date "11-07-2024".

The screenshot shows the Android Studio interface with the project structure on the left and the build file content on the right.

Project Structure:

- Activity XML files: activity_individual_user_info.xml, activity_main.xml, activity_otp_verification.xml, activity_phone_number_authentication.xml, activity_photo_status.xml, activity_profile_INITIALIZATION.xml, activity_splash_screen.xml.
- Layout XML files: adapter_sample_receiver_layout.xml, adapter_sample_sender_layout.xml, fragment_chats.xml, fragment_profile.xml, fragment_status.xml, layout_mainactivity_chatlist.xml, layout_mainactivity_search_user.xml, layout_photostatus.xml, profile_pic_dialog.xml.
- Menu XML files: contextmenurecyclerview.xml, menu.xml.
- Resource XML files: mipmap, values, xml.
- Generated resources: res (generated).
- Gradle Scripts:
 - build.gradle.kts (Project: Word_Wave)
 - build.gradle.kts (Module :app) - This file is selected.
 - proguard-rules.pro (ProGuard Rules for ":app")
 - gradle.properties (Project Properties)
 - gradle-wrapper.properties (Gradle Version)

Code Editor Content (build.gradle.kts):

```
targetCompatibility = JavaVersion.VERSION_1_8

dependencies {
    implementation("com.github.bumptech.glide:glide:4.11.0")
    annotationProcessor("com.github.bumptech.glide:compiler:4.11.0")
